About AVEVA Group plc

AVEVA™ is a leader in engineering design and information management solutions for the plant, power and marine industries. For more than 45 years it has delivered business critical software solutions to owner operators, engineering contractors and shipbuilders around the world.

Listed on the London Stock Exchange (LSE:AVV), the Group reported pre-tax profits for the year ended March 2013 of GBP 70.7million on revenues of GBP 220.2 million.

AVEVA employs over 1,400 people and has a global sales and support network of 48 offices in more than 30 countries, serving over 3,000 customers globally.

Our Vision

"Always the leading innovator and our customers' most trusted partner"

Our Mission

"AVEVA enables the creation and management of complex digital assets, allowing our customers to work globally with less risk, shorter lead times, and greater business efficiency, throughout the lifecycle of their physical assets"

Markets Served

Oil and gas, pulp and paper, power, chemical, pharmaceutical and shipbuilding industries.

AVEVA™
CONTINUAL PROGRESSION

1967	Established as CADCentre as a breakaway from Cambridge University.
1976	World's first 3D plant design system (PDMS™) – with object-based engineering database.
1979	World's first intelligent P&ID (PEGS) launched at ACHEMA.
1983	CADCentre becomes a private company.
1988	World's first plant walk-through visualisation system (Now AVEVA Review™).
1992	World's first interactive full colour shaded plant design system.
1994	CADCentre management buyout is completed.
1996	CADCentre listed on London Stock Exchange.
1997	World's first Internet-based collaborative plant design solution (HyperPlant).
2001	World's first plant design system for concurrent global project execution (now AVEVA Global™).
2001	CADCentre changed its name to AVEVA.
2002	AVEVA introduces world's leading 3D streaming technology to view plant models.
2004	AVEVA acquires Tribon Solutions, the leading marine design software and services provider.
2006	AVEVA entered FTSE 250 on London Stock Exchange.
2006	AVEVA Laser Model Interface™ launched, providing the world's first direct interaction with laser-scanned 3D plant models.
2008	World's first open standards-based integration of P&ID and 3D design modelling.
2009	AVEVA combines its information management solutions into the single brand AVEVA NET™.
2010	AVEVA acquires Logimatic MARS and ADB Systemer AS.
2011	AVEVA acquires Z+F UK Ltd. (LFM Software)
2012	AVEVA acquires bocad and Global Majic
2013	AVEVA Everything3D™ launched

Customer-centric Strategies

Operations Integrity Management

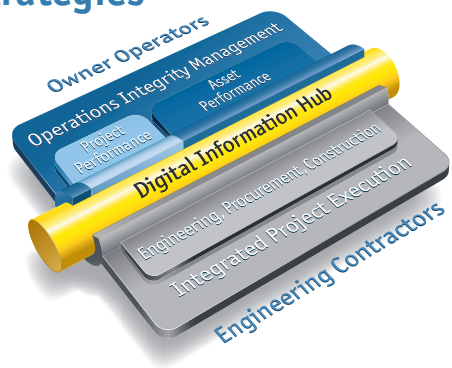
Enables Owner Operators to manage both the project and asset performance of their operations, improving efficiency and reducing risk.

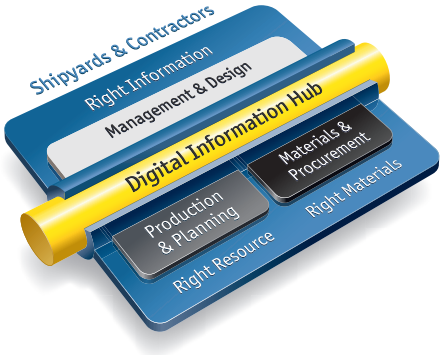
Integrated Project Execution

Enables EPCs to control information, design and engineering resources to improve quality, while cutting cost and reducing project schedules.

Integrated Shipbuilding Strategy

Enables shipyards to efficiently share and manage information from initial enquiry through final handover, improving business efficiency and reducing production costs.





Information-centric Solutions

AVEVA ENTERPRISE

The AVEVA Enterprise™ Solutions portfolio combines enterprise-level software applications and professional services that deliver powerful Information Management capabilities. Based on a very open approach that supports AVEVA products, as well as third-party applications, AVEVA solutions allow clients to exploit their information assets to mitigate operational risk, improve project schedules and reduce costs.

Object-centric Systems

AVEVA MARINE

AVEVA Marine™ is a set of integrated applications created specifically for the unique processes of the engineering and design of ship and offshore structures, design management, and the generation of accurate production information.

AVEVA PLANT

AVEVA Plant™ is an integrated suite of software for plant engineering, design and design management. Built around AVEVA PDMS and using powerful object-centric systems, it is the most productive engineering software solution available for the power and process plant industries.

LFM™

LFM is a powerful 3D laser scanning software package, which is relevant throughout the laser data and asset lifecycle. LFM is hardware and software vendor neutral. It accepts data from all 3D laser scanners and exports to 3D integrated plant design systems CAD and Review platforms. To learn more visit www.lfm-software.com.

"100% of the top 10 energy companies are AVEVA customers"

"100% of the top 10 global chemicals companies are AVEVA customers"

"90% of the top 10 global shipyards are AVEVA customers"

Customers include:

- Abu Dhabi Ship Building
- Aker Solutions
- AMEC
- Areva NP
- Babcock Marine
- BASF
- China Power Engineering Consulting Group Co.
- Daewoo Shipbuilding & Marine Engineering
- EDF
- ExxonMobil
- Foster Wheeler Power Group
- Hyundai Heavy Industries
- Japan Vietnam Petroleum Co. Ltd (JVPC)
- JGC Corporation
- Jiangsu Rongsheng Heavy Industries Group Co.
- Mitsubishi Heavy Industries
- Petrobras
- Petrofac
- Samsung Heavy Industries India PVT Ltd.
- SEDEF Shipyard
- StatoilHydro
- Technip
- WorleyParsons Sdn. Bhd.
