SEPTEMBER 2022

AVEVA Product Naming Transition Guidebook

Over the last two years, we have updated our product names to better showcase the value our products deliver. This document provides an overview of the changes.
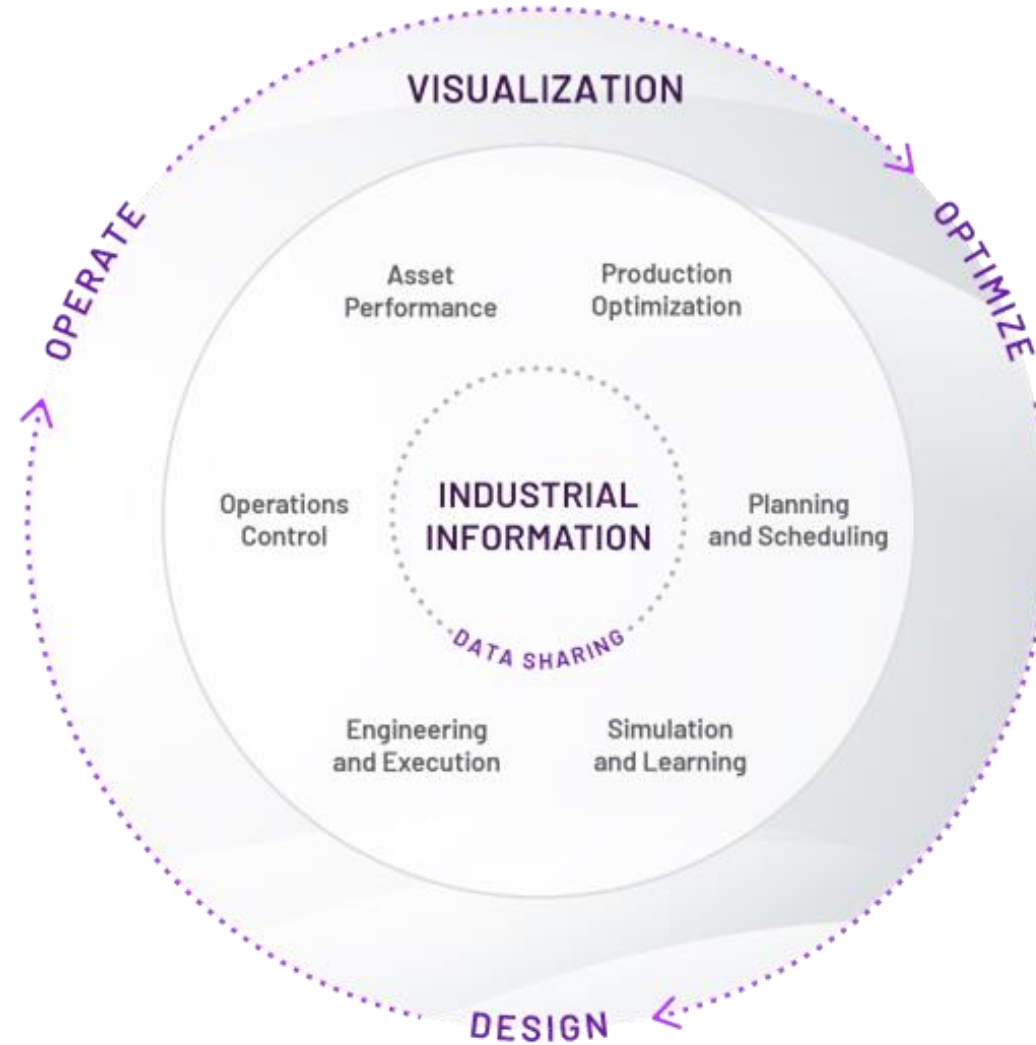

AVEVA

To our valued customers

AVEVA is a global leader in industrial software, sparking ingenuity to drive responsible use of the world's resources. Our secure industrial cloud platform and applications enable businesses to harness the power of their information and improve collaboration with customers, suppliers and partners. We are privileged to have earned the trust of the world's leading industrial companies.

Over the last two years, we have collaborated closely with customers like you to streamline how we present our offerings. This process resulted in a product naming update across our portfolio making it easier to understand our solutions and the value they provide and simplifying the complexity that comes with a myriad of legacy brand names.

This guidebook was periodically updated during our product naming transition, and it provides a convenient reference for former offer names and the functional new names.

Simulation and Learning

Former Name	New Name	Description
DYNSIM Dynamic Simulation • DYNSIM Dynamic Simulation Power	AVEVA™ Dynamic Simulation • AVEVA™ Dynamic Simulation Power	A dynamic process simulator used to study process designs, verify equipment and controls design, and evaluate startup and shutdown procedures.
SIM4ME Portal	AVEVA™ Excel Simulation	Integrates AVEVA software with Microsoft Excel to provide access to simulation models and data for people who don't traditionally use simulation software, such as plant operators, maintenance teams, and plant management.
Historian Emulation	AVEVA™ Historian Simulation	Simulated data historian. Used in OTS projects and for system development testing.
Logic Validator	AVEVA™ Logic Validator	Validate new and updated control strategies with reusable, modifiable, and automated test procedures.
Operator Training	AVEVA™ Operator Training Simulator	Combine dynamic process simulation and emulated control systems to create a virtual control room specific to a single plant or process. Used for expert learners, controls checkout and procedure development.
Integrity Operations	AVEVA™ Pipeline Integrity Monitor	Provides pipeline companies with software layered on top of SCADA to prevent, detect and mitigate the impact of pipeline leaks.
Pipeline Trainer	AVEVA™ Pipeline Training Simulator	Simulates the control and operation of complex oil and gas pipeline networks. Allows pipeline controllers to train on normal and abnormal operating scenarios in a safe and realistic environment.
PLC1	AVEVA™ PLC Simulation	Simulated logic controllers. Used in OTS projects and for system development and testing.
PRO/II Process Engineering	AVEVA™ PRO/II™ Simulation	A steady state simulator that optimizes plant performance and improves process design and operational analysis by performing engineering studies.

AVEVA

Simulation and Learning

Former Name	New Name	Description
SimCentral Simulation Platform	AVEVA™ Process Simulation	Next generation process simulation platform delivering the process side of the Digital Twin. Steady-state and dynamic process simulation using a single model.
New	AVEVA™ Simulation • AVEVA™ PRO/II™ Simulation • AVEVA™ Process Simulation • AVEVA™ Dynamic Simulation	AVEVA Simulation brings AVEVA™ Process Simulation, AVEVA™ PRO/II Simulation, and AVEVA™ Dynamic Simulation into a single cloud environment, enabling you to transform faster, reduce costs, and easily scale. AVEVA Simulation combines the functionality of on-premise software with cloud features designed for the process simulation user.
SCP	AVEVA™ Simulation for Foxboro™ Control	Simulated Foxboro DCS. Used in OTS projects and for system development and testing.
TRISIM	AVEVA™ Simulation for Triconex™ Systems	Simulated Triconex DCS. Used in OTS projects and for system development and testing.
System Platform Simulation	AVEVA™ System Platform Simulation	Simulated System Platform HMI. Used in OTS projects and for system development and testing.
New	AVEVA™ Teamwork	A performance support application in the cloud that empowers workers to learn, solve problems and share knowledge from their workstations.
SIM4ME Thermo	AVEVA™ Thermodynamics	A package of industrially-relevant thermodynamic methods used to predict various physical properties necessary for accurate process simulation.
New	AVEVA™ Unified Learning • AVEVA™ XR for Training • AVEVA™ Operator Training Simulator • AVEVA™ Pipeline Training Simulator	Deliver competency-based experiential learning, so operators perform better in less time. Create a cohesive learning experience that blends ready-to-use options with tailor-made solutions.

AVEVA

Simulation and Learning

Former Name	New Name	Description
EYESIM AR/VR Immersive Training Systems	AVEVA™ XR for Training	Connect operators and plant personnel with high-fidelity 3D process simulation and virtual walkthrough plant environment.
Generic Operator	Process Competency Training	Ready-to-use experiential training courses combining eLearning, simulators, and assessments to train control room operators in typical Chemicals, Power, and Energy plants.

AVEVA

Engineering and Execution

Former Name	New Name	Description
AVEVA Assembly Planning	AVEVA™ Assembly Planning	Building strategy for hull structure and outfitting systems.
AVEVA ProCon	AVEVA™ Contract Risk Management	Contract risk management for EPCs and OOs on CAPEX projects through automated collaboration regarding contractual obligations, approval processes, and contractor payments to control cash flow.
AVEVA Diagrams	AVEVA™ Diagrams	Specification-driven schematic design application for process engineering, enabling creation of P&IDs and schematics integrated with engineering and 3D design.
AVEVA Everything 3D	AVEVA™ E3D Design	AVEVA E3D Design combines the latest 3D graphics and user interface technologies with data management to deliver the most comprehensive, productive and tightly integrated multi discipline 3D plant design solution.
New	AVEVA™ E3D Whitespace Optimizer	An add-on product for AVEVA E3D Design that uses an AI-infused engine via our AVEVA Connect industrial cloud platform to locate and efficiently utilize drawing whitespace to automatically clean-up annotations on drawing deliverables.
AVEVA Electrical and Instrumentation	AVEVA™ Electrical and Instrumentation	Enables multi-discipline teams to create and manage high-quality electrical and instrumentation engineering data and deliverables.
AVEVA Engineering	AVEVA™ Engineering	Multi-discipline engineering data management and collaboration integrated with schematics and 3D design, including efficient production of list and datasheet deliverables.
AVEVA ERM	AVEVA™ Enterprise Resource Management	Combines material management, project planning and production control with engineering data and design models. Supports the entire construction design and delivery process, from initial project planning and material definition, through Bill of Materials management, procurement and logistics, to project and production planning and control.

AVEVA

Engineering and Execution

Former Name	New Name	Description
AVEVA Hull	AVEVA™ Hull Design	For structural design with analysis, cost estimates and transition to detailed design.
AVEVA Outfitting	AVEVA™ Outfitting Design	Accurate and clash-free design of piping, HVAC, cable trays and miscellaneous structures for ships and offshore vessels.
AVEVA P&ID	AVEVA™ P&ID	Draft intelligent project data in the same way a P&ID is designed, using the AutoCAD® drafting system. Generate documents (such as drawings, reports, and lists) that support engineering standards and projects.
New	AVEVA™ Unified Engineering	Brings together engineering, design and simulation to enable global, multi-discipline teams to work concurrently in a common, data-centric environment for maximum transparency and collaboration.

AVEVA

Operations Control

Former Name	New Name	Description
Commercial Advisor	AVEVA™ Commercial Advisor	A single environment for all stakeholders in the liquids (crude or refined) pipeline business process to manage their commodities.
Communication Drivers	AVEVA™ Communication Drivers • AVEVA™ Communication Drivers Pack • AVEVA™ Telemetry Server Communication Drivers	Universal connectivity suite of protocol drivers for telemetry, supervisory and IIoT applications.
Control Configuration Manager	AVEVA™ Control Configuration	Universal centralized configuration solution that manages your application control logic from the HMI to your PLCs.
Development Studio	AVEVA™ Development Studio, formerly Wonderware	Engineering environment for supervisory SCADA, HMI, and MES application development. Used by SI partners and system builders primarily to consignment license. (For Cloud Enabled product, see AVEVA™ Integration Studio.)
InduSoft Web Studio • AVEVA™ Edge Studio - Full Runtime SCADA • AVEVA™ Edge Studio - EmbeddedView HMI • AVEVA™ Edge Studio - CEView Compact HMI • AVEVA™ Edge Studio - IoTView Web HMI	AVEVA™ Edge	HMI/SCADA software capable of scaling from small footprint edge devices and embedded machine HMI to robust SCADA applications. IIoT and edge device management capabilities, easy web publishing, and over 250 native communication protocols included.
OASyS SCADA • OASyS SCADA HMI	AVEVA™ Enterprise SCADA • AVEVA™ Enterprise SCADA HMI	Highly secure and scalable pipeline enterprise SCADA platform for the efficient management of critical infrastructure.
Gas Day Advisor	AVEVA™ Gas Day Advisor	Generate gas load forecasts for current and future gas days, allowing operators to make supply adjustments to meet demand in an optimized way and monitor the actuals (hourly) during the gas day.
Historian	AVEVA™ Historian, formerly Wonderware • AVEVA™ Historian Client • AVEVA™ Historian Client Web • AVEVA™ Historian Publisher • Historian Server Toolkit	High-performance process historian capable of storing huge volumes of data generated in industrial facilities. Historian easily retrieves and securely delivers information to any device, enabling robust asset analysis.

AVEVA

Operations Control

Former Name	New Name	Description
AVEVA Integration Studio	AVEVA™ Integration Studio	Cloud-hosted development environment that facilitates greater collaboration, rapid project creation, project archival, scalability on-demand, and the ability to manage multiple AVEVA HMI development projects simultaneously. (For on-premises product, see AVEVA™ Development Studio, formerly Wonderware.)
InTouch Access Anywhere	AVEVA™ InTouch Access Anywhere	World's most popular window-based HMI solution built on situational awareness graphics and principles.
InTouch	AVEVA™ InTouch HMI, formerly Wonderware	World's most popular window-based HMI solution built on situational awareness graphics and principles.
Measurement Advisor	AVEVA™ Measurement Advisor	Enables gas pipeline operations to accurately and efficiently bill their customers by automated data acquisition, pre-financial verification and correction of field data.
New	AVEVA™ Operations Control	Provides the operations control software necessary for modern industrial operations and gives teams a consistent method of collaborating and operating from a cohesive and sustainable framework.
InTouch Operations Management Interface	AVEVA™ Operations Management Interface	These solutions funnel multiple data sources into a single functional lens, enabling you to visualize operational data.
Pipeline Operations - Gas	AVEVA™ Pipeline Operations for Gas	Pipeline applications layered on AVEVA Enterprise SCADA that support day-to-day operations and provide real-time visibility of gas transmission and gas distribution network operations.
Pipeline Operations - Liquids	AVEVA™ Pipeline Operations for Liquids	Pipeline applications layered on AVEVA Enterprise SCADA that support day-to-day operations and deliver increased business value to crude oil and refined product pipelines.

AVEVA

Operations Control

Former Name	New Name	Description
Citect SCADA • Citect SCADA Anywhere	AVEVA™ Plant SCADA • AVEVA™ Plant SCADA Access Anywhere	Flexible, high-performance site SCADA, enabling Smart Manufacturing through Plant Technology Modernization.
Dream Report	AVEVA™ Reports for Operations	The leading purpose-built industrial reporting solution to address compliance and performance – reports, dashboards and ad-hoc troubleshooting.
Software Asset Manager	AVEVA™ Software Asset Manager	An on-premise application that enables you to easily track and manage installed AVEVA software and licenses running at your site(s).
Sentinel System Monitor	AVEVA™ System Monitor	Keeps a watchful eye on the critical performance indicators associated with your AVEVA software applications and underlying hardware to proactively maintain healthy systems for easy maintenance and reliability.
System Platform	AVEVA™ System Platform, formerly Wonderware	Scalable industrial software platform for Supervisory, SCADA, and IIoT applications that integrates the process with the Enterprise business systems.
New	AVEVA™ Unified Operations Center • AVEVA™ Unified Operations Center for Cities • AVEVA™ Unified Operations Center for Data Centers • AVEVA™ Unified Operations Center for Renewables • AVEVA™ Unified Operations Center for Water	Fully-integrated Operations solution with prebuilt industry application templates for Enterprise Visibility and Decision Support.
Information Server	Information Server	Connects you to the plant information that is on your critical path to success. It is a secure, web-based portal providing a single point of access to your industrial software.
New	Vision AI Assistant	Monitors real-time image streams and provides alerts and notifications to operators for immediate action.

AVEVA

Asset Performance

Former Name	New Name	Description
APM Assessment	AVEVA™ APM Assessment	Provides integrated insight on what to improve in the business, where to start and how to prioritize actions. The result is a clear roadmap and measurable action plan.
Risk-based Maintenance	AVEVA™ Asset Strategy Optimization • Reliability Centered Maintenance • Root Cause Analysis • Simulation for Optimization • Spare Parts Optimization • Asset Strategy Library	Risk-based Maintenance helps users balance risk, cost and performance associated with asset maintenance strategies. It is the fundamental building block for every predictive analytics journey starting with a deep understanding of critical assets, failure behavior and mitigating actions. It will enable an asset strategy prioritized by risk.
AVEVA Change Manager	AVEVA™ Change Manager	Allows upload of information into the Digital Information Hub, validating and reporting on information quality. Connects with the EAM/Document Management system to improve information compliance and the ability to make correct operational decisions.
OSIsoft Cloud Services	AVEVA™ Data Hub	Cloud-native data management SaaS that natively integrates with AVEVA PI System. Easily aggregate and enrich real-time operations data, and share it with authorized users, applications, and tools inside or outside the organization.
AVEVA Insight	AVEVA™ Insight • AVEVA™ Insight - Advanced Analytics • AVEVA™ Insight - Guided Analytics • AVEVA™ Insight - BI Gateway • AVEVA™ Insight - Asset Library	Delivers actionable information and Artificial Intelligence capabilities to help your teams improve asset reliability and operational performance.
IntelaTrac Mobile Operator Rounds	AVEVA™ Mobile Operator	Industrial strength, task, and workflow management with an integrated decision-support system for operators in the field.
Monitoring and Diagnostic Services	AVEVA™ Monitoring and Diagnostic Services	Our engineers perform asset monitoring using AVEVA™ Predictive Asset Analytics software to provide early warning alerts and diagnostic guidance to our customers.

Asset Performance

Former Name	New Name	Description
AVEVA Control of Work	AVEVA™ Operational Safety Management	Provides a clear, current overview of all planned and in progress work on a facility and the risk associated with it. It includes permit to work, shift handover and hazardous assessment capabilities reduces risks to personnel and to the facility itself, avoiding incidents and minimizing costly downtime.
PRiSM Predictive Asset Analytics	AVEVA™ Predictive Analytics	Provides early warning notification and diagnosis of equipment issues days, weeks or months before failure. This helps asset-intensive organizations reduce equipment downtime, increase reliability, and improve performance while reducing operations and maintenance expenditures. (for Cloud, see AVEVA Insight)

AVΞVA

Production Optimization

Former Name	New Name	Description
New	Advanced Planning and Scheduling from PlanetTogether	Integrated with AVEVA's Manufacturing Execution System, Advanced Planning and Scheduling software from PlanetTogether automates the optimization of sequence-dependent production schedules by balancing business KPI's with operational constraints.
Advanced Process Control	AVEVA™ APC	Connects directly to a wide variety of automation systems and uses both real-time and historical data to analyze, identify, and model the significant cause-and-effect relationships in a process.
Batch Management	AVEVA™ Batch Management	A control system-independent batch management software that can be used for the most complex batching processes with a high level of flexibility and facilitates the design and implementation of systems that are compliant with Life Science industry regulations.
OSIsoft Cloud Services	AVEVA™ Data Hub	Cloud-native data management SaaS that natively integrates with AVEVA PI System. Easily aggregate and enrich real-time operations data, and share it with authorized users, applications, and tools inside or outside the organization.
New	AVEVA™ Discrete Lean Management	Enables paperless manufacturing and data collection management along with continuous improvement of assembly line productivity with a set of lean manufacturing tools for rapid response to production issues.
AVEVA Insight	AVEVA™ Insight • AVEVA™ Insight - Advanced Analytics • AVEVA™ Insight - Guided Analytics • AVEVA™ Insight - BI Gateway • AVEVA™ Insight - Asset Library	Delivers actionable information and Artificial Intelligence capabilities to help your teams improve asset reliability and operational performance.
Manufacturing Execution System	AVEVA™ Manufacturing Execution System • AVEVA™ Enterprise Integration	A complete set of integrated inventory, production and quality operations management and plant performance monitoring functionality with a model-driven, process-centric approach to best practices capturing for reuse, sustainable standardization and continuous improvement in plant and across multi-site manufacturing operations.

AVEVA

Production Optimization

Former Name	New Name	Description
Refinery Off-sites	AVEVA™ Off-sites Management	A fully-integrated, platform-independent software for refinery offsites and terminal operations. It enables sophisticated order, movement and inventory management and delivers optimal crude and products blend planning, scheduling, online control and analyzer statistical quality control.
ROMeo Process Optimisation	AVEVA™ Process Optimization	A comprehensive modelling environment that helps operators to create a digital twin of their refinery or plant, delivering an accurate representation that provides peak real-time performance from operating units as well as engineering tools for assessing operating scenarios. AVEVA Process Optimization applications focus on performance monitoring calculations and process optimization that are used in online (real-time) and offline (what-if) modes.
Yield Accounting	AVEVA™ Production Accounting	A comprehensive production accounting and data reconciliation application. Receipts, tank inventories, process unit inter-flows, and shipments are reconciled using state-of-the-art statistical methods. Balances can be performed daily, weekly, or monthly, or by other time periods.
Ampla Operations Management • Performance • Energy	AVEVA™ Production Management	Connects historians, fleet management systems and other control systems, and contextualizes this data to calculate KPIs for every process, gain visibility into operational performance, track inventory in real time and understand the true utilization of assets and resources for optimizing the productivity, agility and sustainability of the entire value chain.
Recipe Management	AVEVA™ Recipe Management	A control system-neutral commercial off-the-shelf formula and recipe management software which secures consistency and quality while managing more product variation through automation of equipment setup processes and recipe execution.
Workflow Management	AVEVA™ Work Tasks	An industrial business process management software that supports the digital transformation and automation of operational work processes and standardization of best practices in a manufacturing enterprise.

Planning and Scheduling

Former Name	New Name	Description
New	Advanced Planning and Scheduling from PlanetTogether	Integrated with AVEVA's Manufacturing Execution System, Advanced Planning and Scheduling software from PlanetTogether automates the optimization of sequence-dependent production schedules by balancing business KPI's with operational constraints.
Enterprise Crude Knowledge Management	AVEVA™ Crude Assay Management	A solution that takes crude assay management to the next level, introducing core workflows that allows organizations to easily maintain, improve, and distribute their crude oil experience across broad user groups.
Spiral Unified Supply Chain Management • Assay • Network • Plan • Process Model Generator • Schedule	AVEVA™ Unified Supply Chain	A single, unified, enterprise application across all supply chain activities that supports the necessary workflows for Oil & Gas Downstream and Mining. It enables new workflows that cross traditional tool boundaries, creating powerful collaboration and knowledge sharing to drive better decision making.

AVEVA

Industrial Information

Former Name	New Name	Description
AVEVA Engage	AVEVA™ 3D Asset Visualization	Provides a connected view of project and asset information using data referenced in AVEVA Asset Information Management. It delivers an efficient and effective decision support capability for capital projects and operations environments.
PI Adapter for <data source>	AVEVA™ Adapter for <data source>	Lightweight off-the-shelf connectivity solutions that enable new industrial IoT data patterns and that can send data to an on-premises AVEVA PI Server, Edge Data Store, or to AVEVA Data Hub. AVEVA Adapters are supported on both Linux and Windows operating systems and can be deployed on rugged devices to monitor remote assets.
AVEVA NET • AVEVA NET Gate keeper • AVEVA NET Gateways • AVEVA NET Workhub and Dashboard	AVEVA™ Asset Information Management • Advanced • Discovery	Integrates asset data from engineering and operations to let users securely access, validate, and collaborate on the Digital Asset data, delivering fast, effective navigation of asset information.
OSIsoft Cloud Services	AVEVA™ Data Hub	Cloud-native data management SaaS that natively integrates with AVEVA PI System. Easily aggregate and enrich real-time operations data, and share it with authorized users, applications, and tools inside or outside the organization.
Historian	AVEVA™ Historian, formerly Wonderware • AVEVA™ Historian Client • AVEVA™ Historian Client Web • AVEVA™ Historian Publisher • Historian Server Toolkit	High-performance process historian capable of storing huge volumes of data generated in industrial facilities. Historian easily retrieves and securely delivers information to any device, enabling robust asset analysis.
AVEVA Information Standards Manager	AVEVA™ Information Standards Manager	Ensures both quality and consistency of information on every application and business process by rationalizing class libraries. It also enables more efficient business processes without the costs and risks of replacing numerous individual authoring applications.

AVEVA

Industrial Information

Former Name	New Name	Description
AVEVA Insight	AVEVA™ Insight • AVEVA™ Insight - Advanced Analytics • AVEVA™ Insight - Guided Analytics • AVEVA™ Insight - BI Gateway • AVEVA™ Insight - Asset Library	Delivers actionable information and Artificial Intelligence capabilities to help your teams improve asset reliability and operational performance.
PI DataLink™	AVEVA™ PI DataLink™	Microsoft Excel add-in that enables users to pull information from AVEVA PI Server directly into a worksheet. Users can aggregate, monitor, analyze, and report data using the familiar computational, graphical, and formatting capabilities of Excel.
PI Integrator for Business Analytics	AVEVA™ PI Integrator for Business Analytics	Self-service data preparation tool for transforming subsets of data from AVEVA PI Server into cleansed, row-column data sets for business intelligence tools and AI/machine-learning platforms.
PI Server	AVEVA™ PI Server	Data storage and processing software for managing huge volumes of time-series operational data and associated contextual information, analytics, events and notifications.
PI Vision™	AVEVA™ PI Vision™	Web-based dashboarding tool for configurable, self-service visualization and analysis of AVEVA PI Server data. It includes straightforward web and mobile interfaces for rapidly building, managing, and sharing reusable, real-time displays without programming.
AVEVA LFM Server (on premises) AVEVA LFM Connect (cloud)	AVEVA™ Point Cloud Manager	The on-premises solution enables secure and on-demand global access to 3D data capture for asset visualization, inspection and project execution. The cloud offering combines all AVEVA Point Cloud Management functionalities into one streamlined, flexible, and high performing cloud solution.

AVEVA

Industrial Information

Former Name	New Name	Description
RtReports	AVEVA™ RtReports	Web-based enterprise reporting application for generating configurable, fully-traceable and regulatory-compliant reports based on data from AVEVA PI Server.
New	AVEVA™ Unified Operations Center • AVEVA™ Unified Operations Center for Cities • AVEVA™ Unified Operations Center for Data Centers • AVEVA™ Unified Operations Center for Renewables • AVEVA™ Unified Operations Center for Water	Fully-integrated Operations solution with prebuilt industry application templates for Enterprise Visibility and Decision Support.
Edge Data Store	Edge Data Store	Lightweight industrial IoT software for collecting, storing, and accessing operational data from remote assets in harsh environments or from legacy assets with limited diagnostic capabilities.
Information Server	Information Server	Connects you to the plant information that is on your critical path to success. It is a secure, web-based portal providing a single point of access to your industrial software.
PI Connector for <data source>	PI Connector for <data source>	Hundreds of off-the-shelf connectivity solutions for collecting high-frequency data from control systems, assets, and sensors, and for sending the data to AVEVA PI Server. The best choice will depend on your specific data source and collection preferences.
PI Interface for <data source>	PI Interface for <data source>	Hundreds of off-the-shelf connectivity solutions for collecting high-frequency data from control systems, assets, and sensors, and for sending the data to AVEVA PI Server. The best choice will depend on your specific data source and collection preferences.

Experience

Former Name	New Name	Description
AVEVA Connect	AVEVA™ Connect, industrial cloud platform	Enables access to all your hybrid SaaS applications in one secure location with ease. Based on deep industrial experience, it helps industrial businesses manage their ecosystems, make data driven decisions, and scale with ease.
AVEVA Connect Administration • AVEVA Connect Calm	• AVEVA Connect Administration • AVEVA Client Activated License Management	Integral elements of the AVEVA Connect platform, designed to make it easy to administer and maintain the unified cloud platform.
AVEVA Experience	AVEVA™ Cloud Training Center	Free self-training center for AVEVA Connect solutions including AVEVA E3D Design
Customer FIRST	AVEVA™ Customer FIRST Program	This program of software maintenance, technical support, and optional success-based services helps you get the most from your AVEVA software throughout its life and achieve your key business objectives.
New	AVEVA™ Edge Management • AVEVA™ Edge IoT View	Available via AVEVA Connect, enables edge applications (e.g., AVEVA Edge IoT View) to be successfully incorporated into a variety of hybrid architectures, including industrial internet of things (IIoT). The result is an edge application lifecycle that enables operational excellence and asset performance.
AVEVA Flex	AVEVA™ Flex, subscription program	A flexible subscription program that spans any mix of cloud, hybrid and on-premises solutions across AVEVA's comprehensive portfolio with simplicity in the license purchase, usage, and management.

This presentation may include predictions, estimates, intentions, beliefs and other statements that are or may be construed as being forward-looking. While these forward-looking statements represent our current judgment on what the future holds, they are subject to risks and uncertainties that could result in actual outcomes differing materially from those projected in these statements. No statement contained herein constitutes a commitment by AVEVA to perform any particular action or to deliver any particular product or product features. Readers are cautioned not to place undue reliance on these forward-looking statements, which reflect our opinions only as of the date of this presentation.

The Company shall not be obliged to disclose any revision to these forward-looking statements to reflect events or circumstances occurring after the date on which they are made or to reflect the occurrence of future events.

ABOUT AVEVA

AVEVA is a global leader in industrial software, sparking ingenuity to drive responsible use of the world's resources. The company's secure industrial cloud platform and applications enable businesses to harness the power of their information and improve collaboration with customers, suppliers and partners.

Over 20,000 enterprises in over 100 countries rely on AVEVA to help them deliver life's essentials: safe and reliable energy, food, medicines, infrastructure and more. By connecting people with trusted information and AI-enriched insights, AVEVA enables teams to engineer efficiently and optimize operations, driving growth and sustainability.

Named as one of the world's most innovative companies, AVEVA supports customers with open solutions and the expertise of more than 6,400 employees, 5,000 partners and 5,700 certified developers. With operations around the globe, we are headquartered in Cambridge, UK.
