AVEVA™ Plant SCADA (formerly Citect SCADA) Training Track

Leading, flexible, and high-performance Supervisory Control and Data Acquisition software solution for industrial process customers

1 Plant SCADA Configuration* 🔗

Plant SCADA

Project Management

Topology

I/O Communications

Equipment

Configuring Mixer 100

Content Pages

Navigation

Graphic Elements and Animation

Operator Input

Genies and Popup Pages

Composite Genies

Devices

Faceplates

Data Import and Export

Alarms

Devices and Events

Trends

Reports and Security

Advanced Graphics

**This course is offered in 2020 R2 version.

2 Citect SCADA Architecture and Redundancy** 🔗

Citect SCADA Architecture

Citect SCADA Redundancy

Online Changes

Clustered Control System

Project Deployment

System Security

**This course is offered in 2018 R2 version, new course coming soon.

3 Citect SCADA Programming with Cicode ** 🔗

The Cicode Development Environment

Introduction to Programming

Functions, Variables and Data Types

Arguments and Return Functions

Logics and Statements

Input and Output

Complex Data Structures

Using Cicode Programming Standards

Cicode Debugger

**This course is offered in 2018 R2 version, new course coming soon.
