

Climate action at AVEVA

AVEVA is working toward a future that keeps global warming below 1.5°C

Our Environmental, Social and Governance approach

Our ESG vision and supporting framework sets the direction we take to drive sustainability throughout our own operations, our culture and through the software we develop.

We are committed to reducing our impact on the planet. We aspire to lead by example on how we measure, mitigate and report on our Greenhouse Gas (GHG) emissions and to working across our entire value chain to accelerate the transition to net zero global economy.

Climate action goals

2030: Achieve net zero emissions across our operations (Scopes 1 and 2) and halve our Scope 3 emissions*

2050: Achieve net zero emissions across our value chain (Scopes 1, 2 and 3)*

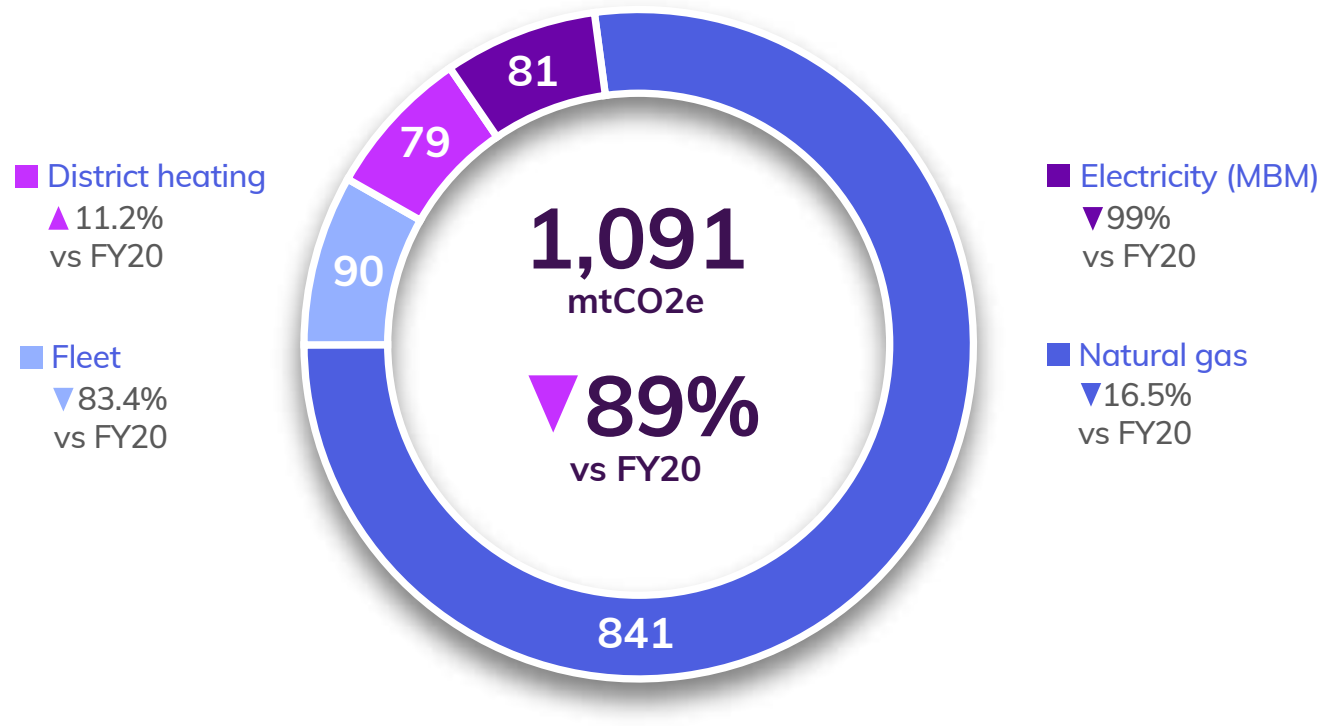

*Undergoing review by SBTi

Our carbon emissions across our value chain

A deep dive into our data

FY22 Total scope 1 & 2 operational footprint

FY22 Scope 3 Value Chain Footprint

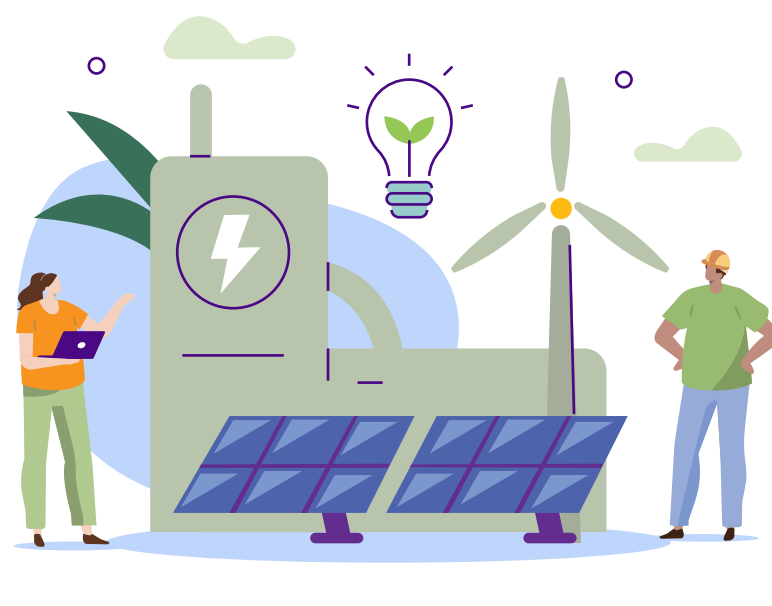

379,550 mtCO2e (▲1.3% vs FY20)

Our road to net zero

2020–2022: Milestones

- Procured 100% renewable energy in FY22
- Aligned with the Task Force on Climate-Related Financial Disclosures (TCFD) framework
- Engaging with top 150 suppliers through CDP's supply chain platform
- Set emission reduction targets aligned with Science Based Targets initiative (SBTi):
- Pursuing ISO14001 certification in Hyderabad, India

2022–2025: Accelerating mitigation actions

- Reduce greenhouse gas (GHG) emissions across operations (Scopes 1 & 2) by at least 90%
- Reduce GHG emissions associated with business travel (Scope 3) by at least 20%
- Deploy an e-waste program based on a circular economy model
- Deploy updated ESG supplier policies/processes
- Implementing additional abatement measures
- Increase the number of cloud offerings and deploy green product design principles
- Target a 100% reduction of our company fleet
- Verify GHG inventory using external auditors

2025–2030: Scaling up to hit emissions reduction targets

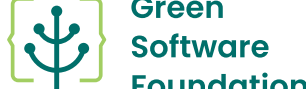

- Explore sustainable natural gas or electric heating
- Advance sustainable business travel choices
- Source at least 5% sustainable aviation fuels (SAF)
- Continue investing in Renewable Energy Certificates (RECs)

2030–2050: Reaching our long-term net-zero ambition

Delivering efficient, sustainable solutions will be our utmost priority. Not only will we actively work towards cloud migration to enable low carbon transitions for our customers, but we will also prioritize decarbonization across our value chain.
