

How does your company deal with

ENERGY INTENSITY

For operations managers and sustainability policy owner who need to better monitor and analyze their many energy streams, our Web-based reporting system will provide with both the right granularity and actionable information for all your reporting and optimization needs

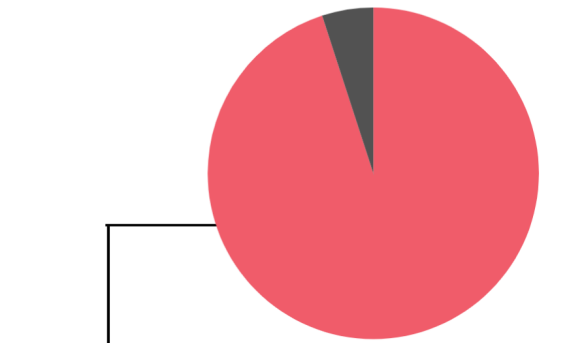

1. BENCHMARKING, BEST PRACTICE

● How do you benchmark energy usage over time and between locations?

In the event you need to reduce your energy per unit cost, per product, how do you measure and allocate energy costs?

2. ENERGY INTENSITY

● % unit cost contribution BOM

Comply with sustainability CSR (corporate social responsibility) policy

3. MEASURE STREAMS OVER TIME

In the event your company wants to report energy consumption to the public

4. REPORT COMPLIANCE

In the event you want to verify your utility company against your actual usage

7.DO FEWER THINGS

how do you get your electricity or water consumption

8. USE THE RIGHT SOFTWARE

EMS Standard Edition
or
EMS Advanced Edition
