# Experience the Difference

EVANS is the global leader of solutions for control room environments. Backed by almost 40 years of experience, thousands of installations, serving 15 industries, it's our experience that makes the difference for our customers. EVANS has helped clients, integrators, engineers and architects with specialized control room environments that support some of the most important operations around the world.

EVANS has the largest and most experienced team focused solely on control room environments in the world.

## The EVANS “Why”

Our “what” is pretty compelling, and so is our “how” for that matter. But what’s and how’s are not what gets us out of bed every morning; it’s our “why”.

We know how high the stakes are for our clients and we know they rely on us explicitly for the control rooms that power their organizations and missions; it’s a responsibility that we not only accept, we fully embrace. The relationships we hold with our clients are built upon a solid foundation of trust; and to us, that means everything.

Our unrelenting mission is to provide the very best control room environments in the world.

## Our Holistic Approach is Your Strategic Advantage

From consoles to lighting; seating to visualization solutions; access flooring and custom millwork to acoustics; our integrated, fully managed approach benefits your project from start to finish.

The breadth and depth of our products and services is founded on our vast experience. Serving diverse industries from public safety to aviation; process control to technology; government to utilities; EVANS has the expertise and experience to deliver the world's best control room solutions for today's needs... and tomorrow's.

Our experience and passion are the cornerstones for delivering unmatched quality, craftsmanship and value, every time, without fail.

## Projects, not Products

Over the past 40 years, EVANS has developed a reputation for quality, flexibility and durability throughout our extensive array of console solutions, and we're very proud of it. But to us the physical product is really just the tip of the iceberg; the EVANS difference goes much deeper. Command Centers are complex ecosystems, not just a room full of fancy desks and monitors.

## From Concept to Completion

Our industry leading Turnkey Solutions (TKS) team works with you every step of the way in the deployment of your mission-critical operation. From initial design advisory services right through to construction, we manage it all for you. And we're by your side long after, too. Our continued support, maintenance and advisory services enable you to focus on your core business once the project is operational.

## Here to Serve

From the small municipal 911 dispatch center to NASA's Mission Control; oil refineries to the Pentagon; the air traffic control tower in the world's busiest airports to the power grid in your community; EVANS is in your corner every single day.

The knowledge we have gained over almost four decades is your strategic advantage. We apply our learnings from each and every project to continually improve how we support our clients.

It is our absolute privilege to be able to support organizations in the following industries

### *Aviation:*

Air Traffic Control, Operations, Passenger Terminals

### *Government:*

Federal, Military, Cyber Security

### *Process Control:*

Oil & Gas, Petrochemical, Manufacturing

### *Public Safety:*

Traffic Management, 911 Dispatch, Emergency Operations

### *Utilities:*

Waste Water, Power Generation, Electrical Transmission & Distribution
