

Longwatch™ OMI App

Video Application for AVEVA Operations Management Interface / OMI

- Compatible with AVEVA Operations Management Interface / OMI
- On-screen PTZ control including presets
- Integrated playback mode
- DVR playback with multi-camera synchronization

Display video in AVEVA Operations Management Interface / OMI

Longwatch OMI App is a software application that lets you drop in live and stored video windows and camera controls into your custom HMI. It interfaces seamlessly with your video system so you can easily view and control video and cameras that are deployed throughout your operation.

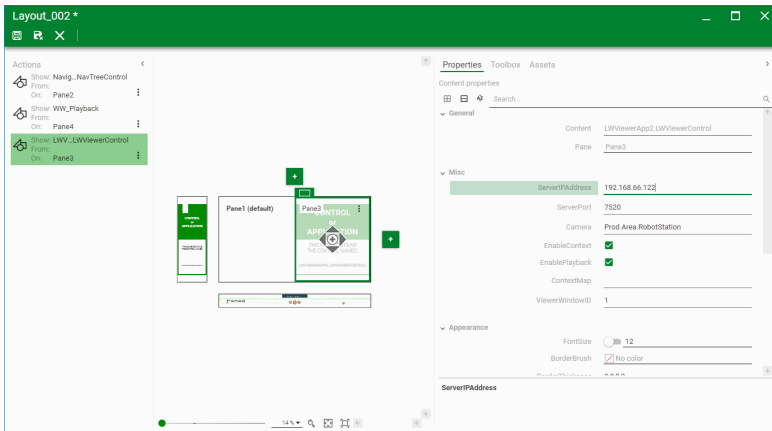

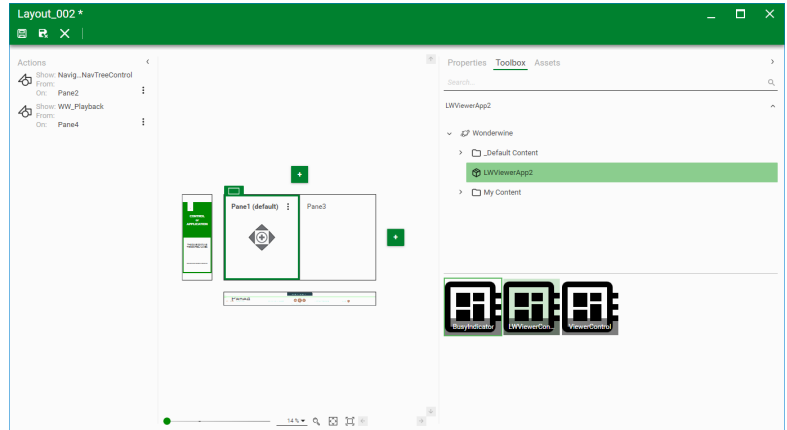

The AVEVA OMI system is a powerful HMI development tool that provides a WYSIWYG interface for creating unified visualization clients for any computing

platform. Design industrial applications once and deploy anywhere, on any device screen, the first time.

With IVC's Longwatch OMI App, you can create modern HMIs that include video and camera controls, without having to be an expert in UI scripting.

Embedding video into AVEVA OMI is now easier than ever.

Drag & drop Longwatch Viewer objects into layout

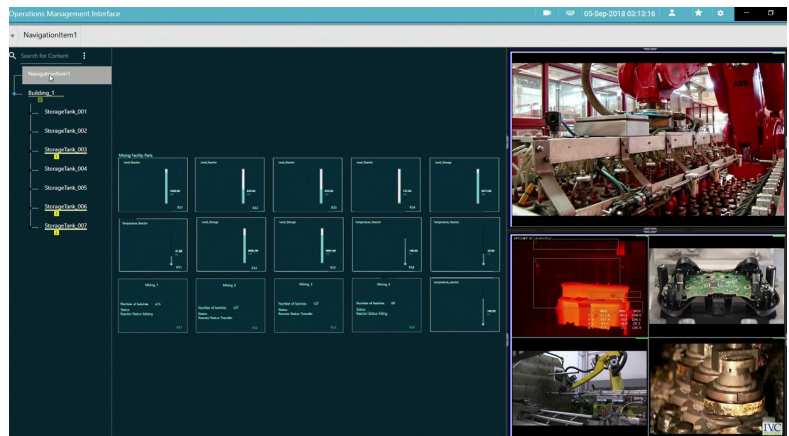

Assign properties to Longwatch Viewer objects:

- VCC IP address
- Camera
- Object context
- Enable playback of saved video

Embed the complete power of the Longwatch video system into your HMI:

- Live & saved video with controls
- Synchronized multi-camera playback
- Display of correlated historical data
