

SAP® Certified

Integration with SAP NetWeaver®

PLANT FLOOR TO SAP INTEGRATION

Overview

NLINK® is a light-weight, configuration-based, agile plant floor to SAP integration engine designed to be easily deployed and maintained at the plant-level as a complement to, (not a replacement for), a company's existing corporate integration tools and standards. It addresses the "last mile" of plant floor to SAP integration removing the need to write, deploy and maintain custom code.

Built-in SAP Features

NLINK comes with a number of built-in SAP integration features and capabilities:

1. Requires nothing to be installed or maintained in your SAP landscape. We connect using a standard SAP user account that is completely governed by SAP security.
2. Requires no additional SAP component or infrastructure (such as NetWeaver, SAP PO, etc.) to be installed.
3. Works with any version of SAP ECC or SAP S/4HANA release and support pack.

Built-in Enterprise Features

NLINK comes with a number of built-in enterprise features and capabilities:

1. Built-in Robust Store & Forward capabilities should SAP become unavailable:
 - Data is automatically synchronized in the order it was reported on the plant floor when SAP comes back on-line.
2. Provides Independent Interface Audit Trail.
3. Supports E-mail Alerts for Administrators.

System Benefits

NLINK provides a Loose Coupling between Plant Floor systems and SAP:

- Isolates companies from problems with SAP upgrades
- Isolates companies from problems with Plant systems upgrades

NLINK provides a Flexible & Manageable Deployment Architecture:

- Easily promote SAP interface changes
- Facilitates Rapid Deployment of new SAP interfaces
- Easy cookie-cutter roll-out to plants 2...N

Summary

NLINK is a mature field-proven, supported product successfully deployed for 20 years in more than 30 countries across 5 continents and provides significant benefits over custom coding.

About Junot Systems

Junot Systems, Inc. is a specialist provider of SAP integration solutions for the manufacturing and process industries. Headquartered in Houston, Texas, Junot Systems, Inc. has deployed and supported its NLINK product suite for more than 20 years in a variety of vertical markets, both in the US and overseas.

About Junot Systems' Solutions

NLINK[®] is a configuration-based product suite that installs in minutes and requires absolutely no custom coding to be deployed. NLINK's patented and SAP Certified Interfaces work with any version of SAP and require no additional SAP components to be purchased or installed into the SAP landscape.

NLINK is a registered trademark of Junot Systems Corporation. SAP is a registered trademark of SAP AG. Other names of actual companies and products mentioned herein may be the trademarks of their respective owners.
