# AVEVA Product Naming Transition Guidebook

We are updating our product names in 2020 and early 2021 to better showcase the value they deliver to you. Please review this document to see the changes.

**AVEVA**

# To Our Valued Customers

It's a time of unprecedented change. AVEVA is privileged to have earned the trust of the world's leading industrial and infrastructure companies. We are helping businesses around the world stay ahead of the disruption and find opportunity with innovative thinking and advanced software solutions. You can learn more about how we are supporting our customers' business continuity and transformation efforts [here](#). As AVEVA looks to advance industries while enhancing the human experience, it's important, especially now, to add clarity and simplicity into how we help our customers optimize engineering, operations and performance.

We've collaborated closely with customers like you to streamline how we present our offerings. This process resulted in a product naming update across our portfolio. We feel confident that this update will make it easier for customers to understand our solutions and the value they provide.

Through 2020 and early 2021, you will see some of our product names being updated to remove legacy brand associations and become functional. The goal behind the change is to make it easier for customers like you to understand the holistic benefit that AVEVA offers and to simplify the complexity that comes with a myriad of legacy brand names.

To ease the process of name changes, we created this guidebook that details our current offer names and the functional transition for the entire AVEVA portfolio.

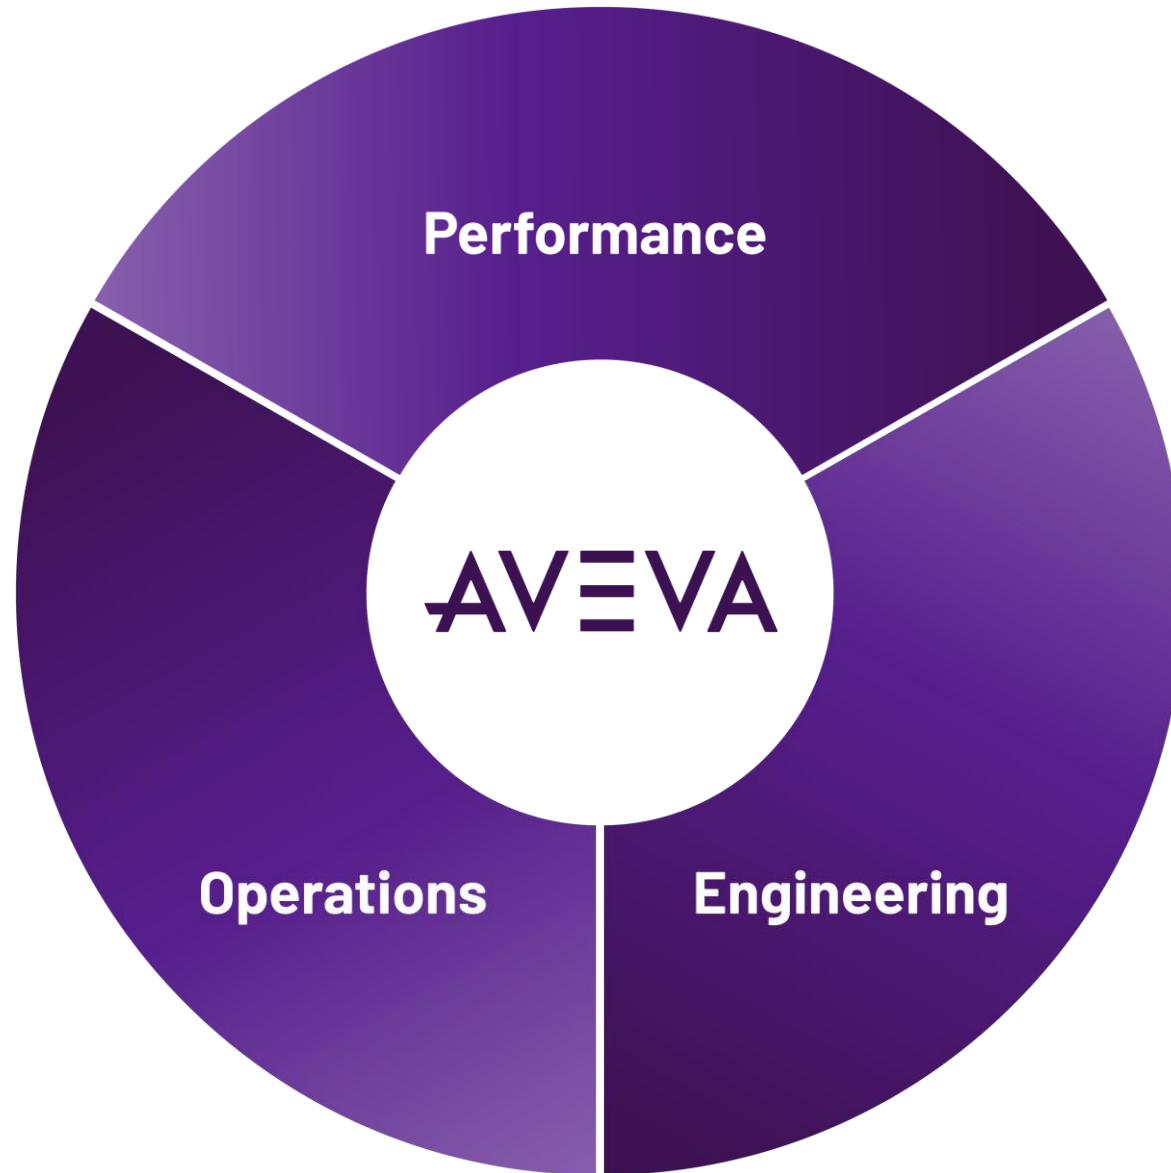

## **Next steps**

While we are updating product names in our portfolio, this activity will warrant no changes in your contracts and relationships with AVEVA. We will continue to provide the same level of support you have come to expect from us.

If you would like more detail on the name changes, your account manager is available to address your questions.

Thank you for your business and continued support.

**Mike Pring**  
**Head of Global Customer Support & Success**
