

SERVICES PROFILE

AVEVA™ E3D Design - Draw Styles Configuration

The most advanced and powerful 3D plant design solution

AVEVA E3D Design takes plant design to a new level of productivity and efficiency and is fully interoperable with other AVEVA Engineering and Design solutions. AVEVA can provide a set of activities to configure the styles libraries used in representation rules for AVEVA E3D Design - Draw. This service unlocks the potential of creating drawings using a standard set of customer-defined colors.

Create drawings using a standard set of customer-defined colors

AVEVA E3D Design is the world's most technologically advanced and powerful 3D design solution for the process plant, marine, and power industries. It offers class-leading productivity and capabilities while retaining seamless compatibility with other AVEVA Engineering and Design solutions.

Value

The styles libraries feature available with AVEVA E3D Design - Draw has a number of capabilities that improve the drawing-generation process:

- Standardizes the way elements are represented in drawings
- Provides different options to represent a single element depending on its position and role in the drawing
- Allows you to choose when to use or not use additional features, such as arrows in lines to enhance drawing visualization
- Facilitates administration maintenance and enhancement through an organized and intuitive styles hierarchy

What's included

- Detailed check of your standard documentation, mainly for piping, but can also check other discipline drawings to form a general perspective of drawing style requirements
- Review of your project database to confirm it has the requirements for the configuration of the styles
- Creation of the styles elements hierarchy in the project database
- Creation of style elements, configuring color and line type representation
- Test and validation to confirm the styles are correctly configured

Accelerating your success!

AVEVA is continually developing and expanding a range of optional success accelerators designed to help you throughout the lifecycle stages of your application.

Plan & Implement – Engineer best practices and application architecture and improve time to value

Operate – Effectively run your software with expert training and drive increased engagement and adoption

Maintain – Efficiently maintain your software, including updates, patches, and license management

Optimize – Improve software performance and reliability and drive changes to address new market requirements

Evolve – Drive innovation through the deployment of major version upgrades, adopt new technology, and future-proof your application
